

BIG-IP Administration Data Plane Configuration (F5CAB3)

Master the practical skills needed to configure BIG-IP virtual servers and manage pools with this F5CAB3 training. You'll learn to apply procedural concepts that support real-world data plane traffic management in BIG-IP environments. After completing this F5 training, you'll be able to confidently deploy, modify, and maintain core BIG-IP traffic objects in production networks.

WEEK 1

Configuring Health Monitors

129 min.

Health Monitors	8
Types of Health Monitors	11
Configuring a Basic Health Monitor	11
Monitoring Content Health	5
Health of Members Versus Nodes	4
Validation	3

Managing Persistence Profiles

Introduction	1
Types of Persistence on the Big-IP	10
Source Address Affinity	6
Configuring Source Address Affinity Persistence	5
Cookie Persistence	8
Configuring Cookie Persistence	5
Troubleshooting Persistence	6
Validation	5

Managing Profiles and Pools

Introduction	1
Applying Appropriate Profiles	7
Identify iApp Configured Objects	7
Report Use of iRules	5
Default Pool Configurations	3
Managing Pools	13
Validation	5
