

Building Webservers with Express.js Tutorial

This Express.js tutorial covers how to create and customize a web server with Express.js. Express.js has a minimalistic design, middleware support, and a large ecosystem, which makes it perfect for software engineers with big ideas and a creative approach. This course covers using Express.js to build your web servers for you.

WEEK 1

Build Webservers with Express.js: The Basics 157 min.

Introduction	1
Setting Up an Express Project	10
Creating an Express Server	12
Adding Basic Request Handlers	11
Separating Express Routes by Path	13

Build Webservers with Express.js: Handle Different Request Types

Overview	1
Introduction	1
Handling Different Request Types	9
Testing POST, PUT, and DELETE Routes	12
Handling a Request Body	20
Handling URL and Query Parameters	13

Build Webservers with Express.js: Middleware and Related Concepts

Overview	1
Introduction	1
Methods for Customizing Responses	17
Working with Cookies	14
Adding Middleware to Express Servers	19

WEEK 2

Build Webservers with Express.js: Simple REST API Example 15 min.

Overview	1
Introduction	1

Creating a "List" Endpoint	12
Creating a "Read" Endpoint	7
Creating a "Search" Endpoint	10
Creating a "Create" Endpoint	11
Creating "Delete" and "Update" Endpoints	11

Build Webservers with Express.js: Front-end Execution Basics

Overview	1
Introduction	1
Front-end vs. Back-end Execution	6
Front-end Execution Basics	11
Loading Data from Express with Front-end Code	9
Modifying Interface Elements	13
Other Front-end and Back-end Interactions	14

Build Webservers with Express.js: Working with Handlebars Templates

Overview	1
Introduction	1
What are Templating Engines?	11
Rendering Handlebars Templates in Express	10
User-Profile Template Example	7
Combining URL and Query Parameters with Templates	14

The Handlebars "If" and "Each" Helpers	9
--	---

Build Webservers with Express.js: Building a Cookies-Based Shopping Cart

Overview	1
Introduction	1
Creating an In-Memory Cart API	18
Working with Cookies in Express and Postman	11
Loading Products and Shopping Cart Data	14
Using Middleware with Cookies	12

Build Webservers with Express.js: Building a Shopping-Cart Front-end

Overview	1
Introduction	1
Creating a Products Page	1
Creating a Products Page (An Alternative Approach)	1
Creating a Shopping Cart Page	1
Adding to and Removing From Cart on the Front-end	1
Filtering Products	1

Build Webservers with Express.js: Full-Stack Todo-List Example

Overview	1
Introduction	1
Basic Strategy and Setup	10
Rendering the Todo List	8
Loading Todo Data into the Front-end	9
Preventing Dangerous Values	6
Creating New Todos	11
Updating Todos	6

Build Webservers with Express.js: Create a Simple Blog Site

Overview	1
Introduction	1
Basic Strategy and Setup	8
Creating the Blog Pages	7
Displaying a List of Articles	10

WEEK 4

137 min.

Using Custom Handlebars Helpers	5
Rendering Individual Articles	6
Reducing Template Repetition with Partials and Layouts	16

Building Webservers with Express.js: Adding Front-end Logic to a Blog Site

Overview	1
Introduction	1
Adding Upvotes to the Back-end	6
Adding Upvotes to the Front-end	10
Adding Comments to the Back-end	7
Adding Comments to the Front-end	16
Two Methods for Formatting Dates	7
Building a Reusable Articles List	8

Building Webservers with Express.js: Build a Tic-Tac-Toe Game API

Overview	1
Introduction	1
Basic Game Flow and Implementation Strategy	6

Creating New Games	6
Accepting Player Input	6
Generating Computer Moves and Validating Input	11
Calculating Ties and Wins	10
Calculating Diagonal and Corner Wins	10
