

AWS Certified Cloud Practitioner (CLF-C02)

This entry-level AWS Certified Cloud Practitioner (CLF-C02) training prepares cloud administrators for the CLF-C02 exam, Amazon's entry-level cloud certification. This AWS training is designed to help you gain a fundamental understanding of AWS services, and earn your Certified Cloud Practitioner certification. Talk about, evaluate, and use the features of the AWS cloud, regardless of your job role and context.

Course Structure and Expectations	9
The Amazon Web Services Origin Story	5
Walk-Through: Creating an AWS Account	8
Getting Stuff Done on AWS	6
Walk-Through: The AWS Console	19
Validation Challenge: Add MFA to our Root Account	6

Key Cloud Enablers

Skill Introduction	1
Setting the Stage for Cloud	10
Key Cloud Enablers	17
The AWS Global Network	13
The Shared Responsibility Model	7
Validation: Key Cloud Enablers	7

Cloud Economics

Skill Introduction	1
Cost and Value	4
Capital Expense Models	11
Operational Expense Models	6
Total Cost of Ownership	9
Walkthrough: Setting up a Budget Alert on AWS	7

WEEK 2

153 min.

Introduction of Identity and Access Management	6
--	---

Walkthrough: Creating our First IAM User	10
Validation: Cloud Economics	1
Introduction to Networking on AWS	
Skill Introduction	1
AWS Network Structure and Virtual Private Clouds	8
How Internet Protocol Works	10
Doing More with Less...or More	7
Subnets and Subnet Masks	8
Walkthrough: VPC Creation	22
Validation: Introduction to Networking on AWS	1
More AWS Networking Goodness	
Skill Intro	1
Getting Connected with AWS	7
Domain Name Services and Amazon Route 53	12
Amazon CloudFront	8
AWS Global Accelerator	4
Walkthrough: Using Amazon CloudFront and Amazon Route 53	18
Validation: More AWS Networking Goodness	1
Storage Options on AWS	
Skill Introduction	1
The Business Case for Cloud Storage	15
Object Storage	7
Network Storage	5

Archival Storage	5
Block Storage	1
Other Storage Options	7
Walkthrough: Static Web Hosting with Amazon S3	16
Validation: Storage Options on AWS	1
Introduction to Compute on AWS	
Skill Introduction	1
Introducing Amazon EC2	14
Components of an EC2 Instance	5
Other AWS Compute Resources	4
Walkthrough: Creating our First EC2 Instance	15
Validation: Introduction to Compute on AWS	7
More Compute Options on AWS	
Skill Introduction	1
Scalability	7
Auto-Scaling	6
Containers	4
AWS Container Services	4
Serverless	4
Serverless Architectures	8
Walkthrough: Serverless Dad Joke Website	9
Validation: More Compute Options on AWS	6
Database Options on AWS	
Skill Introduction	1
Why Choose Managed Services?	5
Amazon Relational Database Service	11

Amazon Aurora	7
Amazon Redshift	3

WEEK 4

153 min.

Amazon DynamoDB	9
Amazon ElastiCache	4
Amazon Neptune, Timestream and QLDB	1
Schema Conversion Tool and Database Migration Service	3
Walkthrough: Aurora Database Failover	10
Validation: Database Options on AWS	6

Machine Learning and Analytics on AWS

Skill Introduction	1
The Rise of the Machines	9
AWS Analytics Tools	15
AWS Machine Learning Landscape	11
Walkthrough: Fun with AWS ML Services	11
Walkthrough: Using Amazon Bedrock	7
Validation: Machine Learning and Analytics on AWS	1

Data Management on AWS

Skill Introduction	1
The AWS Well-Architected Framework	9
Governance and Compliance	14
Encryption	5
Secrets Manager and Parameter Store	3
Other AWS Safeguarding Tools	4
Walkthrough: Real-time Threat Analysis	12

Validation: Data Management on AWS	5
------------------------------------	---

Developer Tools on AWS

Skill Introduction	1
Acronym Fiesta!	11

WEEK 5

152 min.

Developer Tools	7
Web and Mobile Tools	4
Walkthrough: AWS Cloud9	15
Walkthrough: Amazon CodeWhisperer	3
Validation: Developer Tools on AWS	5

Application Integration & Business Services

Skill Introduction	1
Design Patterns	8
Messaging Services	8
Application Integration and Orchestration	5
Business and End-User Services	15
Walkthrough: Creating Our Own Desktop in the Cloud	16
Validation: Application Integration and Business Services	5

AWS Migrations and Support Options

Skill Introduction	1
Types of Cloud Migrations	7
Migration Tools	12
Infrastructure as Code	11
AWS Support Options	11

Walkthrough: AWS CloudFormation 18

WEEK 6

55 min.

Validation: AWS Migrations and Support Options 4

Cost Management on AWS

Skill Introduction 1

Reserved Instances 10

Savings Plans and Spot Instances 9

Cost Optimization and Monitoring Tools 8

AWS Budgets 3

Pricing Calculator 5

Walkthrough: Price Estimate Creation 9

Validation: Cost Management on AWS 6
