

Google Cloud Compute Engine

This Google Compute Engine training course prepares learners to learn about Compute Engine. This training is designed specifically for cloud engineers looking to grow in their field, as well as new cloud developers. Google Compute Engine enables you to create a network of virtual machines at an extremely low cost. GCE's modular and flexible design makes it easy to develop a full-blown IaaS solution without the burden of managing that infrastructure.

WEEK 1

Plan a Google Cloud Compute Solution

151 min.

Plan a Google Cloud Compute Solution	1
Understanding Google Compute Engine	8
Understanding Google App Engine	8
Understanding Google Kubernetes Engine	6
Understanding Google Compute Serverless	7
Other Google Compute Services	5
Google Compute Pricing and Documentation	9
Google Compute Solution Summary	2

Deploy Google Compute Engine

Overview	1
Supplemental Files	1
Deploy Google Compute Engine	1
Using the Interactive Walkthrough	9
Creating an Instance with gcloud SDK	15
Creating a Managed Instance Group (MIG)	14
Managing Access to Compute Engine VMs	10

Deploy Google Kubernetes Engine

Overview	1
Deploy Google Kubernetes Engine	1
Basic Kubernetes Structure	5
Deploy a Kubernetes Cluster	10
GKE Standard vs Autopilot	11
Logging and Monitoring GKE Clusters	8
Creating Private Clusters	16

WEEK 2**Deploying Google Serverless Functions****160 min.**

Overview	1
Deploying Google Serverless Functions	1
Deploy a Google Cloud Function	11
Deploy a Google Cloud Run Service	7
Deploy a Google App Engine App	10
Trigger a Cloud Function with Pub/Sub	7
Trigger a Cloud Function with Cloud Storage	7
Cleanup Serverless Functions	4

Managing Google Compute Engine

Overview	1
Supplemental File	1
Managing Google Compute Engine	1
Listing and Describing Compute Engine Instances	8
Configuring Compute Engine Instance State	10
Creating and Attaching Persistent Disks	15
Creating Snapshots from Disks	13
Working with Images	8

Google Compute Engine 2014: Qualified Developer

Overview	1
Supplemental File	1
Introduction to Google Compute Engine	11
Getting Started with GCE	11
Demo: Getting Started with GCE	14
Instances	14

WEEK 3**159 min.**

Demo: Instances	15
Persistent Disks	16
Demo: Persistent Disks	13
Images and Snapshots	13
Demo: Images	16
Demo: Snapshots	12
Startup Scripts and Metadata	15
Demo: Startup Scripts and Metadata	16
Networking	19
Demo: Networking	11
Advanced Networking	13

WEEK 4**153 min.**

Demo: Advanced Networking - Configuring a NAT Gateway	13
Demo: Advanced Networking - Configuring Protocol Forwarding	11
Load Balancing	15
Demo: Load Balancing - Network Load Balancing	12
Demo: Load Balancing - HTTP Load Balancing	18
Monitoring	14
Automation	9
Programmatic GCE	16
Demo: Programmatic GCE	21
Upcoming GCE Features	14
Google Cloud Platform Qualified Developer	10
