

# Cisco Cube Configuration

This Cisco training covers how to connect an enterprise's Internet Telephony Service to a Public Switched Telephone Network with Cisco's Unified Border Element (CUBE). If you're an IT professional who's responsible for making sure phone calls connect, keeping sites in-touch, and providing conversations that remain stable, take this CUBE configuration training. It shows you how to keep Cisco collaboration technologies working at their best.

## WEEK 1

### Dual tone multi-frequency (DTMF)

151 min.

Dual Tone Multi-Frequency (DTMF)	7
Named Telephony Events (RFC 2833)	7
Key Press Markup Language (RFC 4730)	5
Unsolicited Notify (UN)	3
CUCM and Unsolicited Notify (UN) Messages	3
DTMF and MTP	3
SIP INVITE(s) compared for DTMF	3
Performing Packet Captures	14

### Voice Translation Rules and Profiles

Introduction	1
Voice Translation Rules	12
Additional Voice Translation Rules	15
Voice Translation Profiles	6
Apply Translation Profiles Inbound to a Dial Peer	11
Apply Translation Profiles Outbound to a Dial Peer	6
Apply Translation Profiles to a Voice Port	8
Voice Translation Rules Verification	5

### CODEC Negotiation and CODEC Preference Lists

Introduction	1
Negotiation of Codecs	8
Default CODEC configuration for a dial peer	8
Configure CUBE Local Transcoding Interface (LTI) Transcoding	9
Configure a Specific CODEC for a Dial Peer	16

## WEEK 2

153 min.

Configure Codec Voice Class and Preference Lists 9

Codec Transparent and SDP Passthrough 9

### Signaling\Media Binding and SIP Profiles

Application Signaling and Media Binding 13

SIP Headers 6

Unsupported SIP Headers 11

SIP Profiles 13

Validation 1

### Inbound and Outbound SIP Profiles

Introduction 1

SIP Profiles Outbound (Part 1) 10

SIP Profiles Outbound (Part 2) 17

SIP Profiles Inbound 11

Validation 3

### CUBE Toll Fraud Prevention

Introduction 1

CUBE Toll Fraud Prevention 4

Toll Fraud Prevention Configuration 6

Toll Fraud Scenario 1 12

Toll Fraud Scenario 2 7

Changing Toll Fraud Rejected Cause Code 6

Validation 5

### CUBE VoIP.ms configuration

Introduction 3

Explore our environment 5

## WEEK 3

153 min.

CUBE VoIP.ms configuration 18

CUBE VoIP.ms testing outbound calls 14

Validation 4

### Registration-based SIP trunks (Local Gateway)

Introduction 1

Local Gateways 13

Webex Calling Trunk 2

Registration-based SIP trunk - Inbound calls from Webex 32

Registration-based SIP trunk - Outbound calls to Webex 9

Local Gateways Configuration Tips 2

Validation 3

### TLS and SRTP

Introduction 1

TLS and SRTP 14

TLS Handshake 8

Configure TLS and SRTP with VoIP.ms 11

What certificates? 9

Make an outbound call 7

Packet Capture on IOS Devices 1

Validation 4

**WEEK 4****Troubleshoot CUBE Dial Plan Elements****54 min.**

Introduction	1
debug voip ccapi inout	10
How to identify the Call ID	6
Troubleshoot DTMF	13
Troubleshoot Voice translation rules and profiles	8
Troubleshoot Codec preference lists	6
Troubleshoot Dial peers	6
Validation	4
