

# GitHub Actions Tutorial: Development Automation

This intermediate GitHub training teaches learners how to use GitHub Actions to automate workflows, speed up development, and reduce errors. Perfect for experienced GitHub users, this course focuses on real-world projects that streamline deployment and minimize workflow issues. Ideal for onboarding new cloud engineers and DevOps professionals or as a GitHub reference resource for teams.

## WEEK 1

### Developing Projects with GitHub Codespaces 158 min.

Intro to GitHub Codespaces	9
Enable and Provision GitHub Codespaces	12
Customize GitHub Codespaces Dev Container	15
Add User-Specific Customizations to GitHub Codespaces	14
Add User-Specific Secrets to GitHub Codespaces	7

### Automatically Publish PowerShell Modules from GitHub Actions

Overview	1
Intro to Publishing PowerShell Modules with GitHub Actions	9
Create a PowerShell Module in GitHub Repository	11
Create GitHub Actions Workflow to Publish Module	12
Auto-increment Build Number in GitHub Repository	19

### Working with Environment Variables in GitHub Actions

Overview	1
Intro to GitHub Actions Variables and Contexts	15
Set Root-level Environment Variables in GitHub Actions	11
GitHub Actions: Environment Variable Order of Precedence	8
Setting Variables with Multiple Job Definitions	12

## WEEK 2

### 157 min.

Using GitHub Actions Context Variables	14
--	----

## Use Service Containers in GitHub Actions

Overview	1
Intro to Service Containers in GitHub Actions	12
Build GitHub Actions Workflow with MySQL Service Container	13
Verify Connectivity and Wait for Service Container	13
Refactor GitHub Actions Workflow and Create Database	15
Run GitHub Actions Steps in Docker Network	8

## Using GitHub Actions Workflow Commands

Overview	1
Intro to GitHub Actions Workflow Commands	15
Create Annotations with GitHub Actions Workflow Commands	14
Group Log Messages in GitHub Actions with Workflow Commands	12
Set Outputs for GitHub Actions Workflow Steps	11
Mask Sensitive Values with GitHub Actions Workflow Commands	5

## Manage GitHub Actions Workflows with Deployments and Environments

Overview	1
Understanding GitHub Actions Environments	9
Create Environments and Explore Deployment Gates	10

### WEEK 3

154 min.

Create GitHub Actions Workflow Using Environment Targets	9
Configure Secrets on GitHub Actions Environments	7

Update Workflow to Utilize Environment Secrets	8
Use IAM Resource Tags to Limit Environment Access	15

## Automatically Publish Container Images with GitHub Packages and Actions

Overview	1
Intro to Building Container Images with GitHub Actions	13
Create Your GitHub Repository and Dockerfile	10
Build GitHub Actions Workflow for Container Registry Auth	11
Include Container Build and Push Step in GitHub Actions	12
Build Multiple Container Images with Single GitHub Actions Workflow	14

## Execute GitHub Actions Workflows on Self-hosted Runners

Overview	1
Intro to GitHub Actions Self-Hosted Runners	13
Install GitHub Runner on Cloud VMs	14
GitHub Runner Custom Labels and Dependencies	9
Develop Workflow Using Self-Hosted GitHub Runners	8
Define Multiple Jobs for Self-Hosted GitHub Runners	7

### WEEK 4

9 min.

Troubleshooting GitHub Actions and Cleanup	8
--	---
