

# Junos Routing Fundamentals

This entry-level Juniper Junos Routing Fundamentals training teaches network administrators how devices running Junos make routing decisions and how to configure them. Learn the basics of traffic forwarding, routing and forwarding tables, route preferences, and dynamic routing protocols. This Juniper course is perfect for onboarding new admins or as a reference to enhance understanding of Junos' unique routing approach.

## WEEK 1

### Understand and Configure Junos Routing

121 min.

Introducing Junos Routing	1
The Fundamentals of Routing	8
Junos Routing and Forwarding Tables	10
How Junos Selects Routes	8
Static Routing	8
Dynamic Routing	4
OSPF Configuration and Verification	8
Junos Routing Instances	6
IPv6 Routing	5
Summarizing Junos Routing	1

### Multi-Vendor OSPF Deep Dive

Overview	1
Introducing OSPF - The IGP of Choice	3
OSPF Adjacency Formation	17
OSPF Areas	6
Configure OSPF on Cisco Devices	10
Configure OSPF on Juniper Devices	7
Verify OSPF on Each Device	7
OSPF Reference Bandwidth	8
Summarizing Multi-Vendor OSPF	1
