

MPLS Fundamentals

Master MPLS and implement L3VPNs with this intermediate MPLS networking training. Learn to use label switching for tunneling traffic, simplify routing, and control MPLS L3VPNs. Topics include MPLS architecture, LDP label switching, and routing CE to PE. This networking course is ideal for network engineers and IT teams looking to strengthen MPLS skills and improve network efficiency.

WEEK 1

MPLS Fundamentals (v0.8.4)

153 min.

| | |
|------------------------------|----|
| Supplemental Files | 1 |
| Welcome to MPLS Fundamentals | 4 |
| The Big Picture | 11 |
| Label-Based Forwarding | 22 |
| Implementing MPLS | 29 |
| LDP | 32 |
| LSP Path Selection | 19 |
| LIBs, FIBs and RIBs | 17 |
| Transport Address | 18 |

WEEK 2

156 min.

| | |
|-------------------------------------|----|
| MPLS L3VPN Architecture | 21 |
| PE to PE MBGP | 19 |
| VRFs | 31 |
| CE to PE Routing | 20 |
| Redistribution | 33 |
| Control and Data Plane Verification | 32 |

WEEK 3

20 min.

| | |
|-----------------------|----|
| VRF Enabled Utilities | 19 |
|-----------------------|----|
