

NetApp Storage

Learn to transition, install, and maintain NetApp storage systems. This NetApp Storage training provides essential skills for network admins managing NetApp in hybrid cloud environments. Master everything a network administrator who works with NetApp devices needs to know, from basic concepts of wide-area networks to manually configuring NetApps' proprietary operating system, ONTAP.

WEEK 1

NetApp Certified Storage Associate (NCSA) NS0-1459 min. Understanding Storage Basics

Supplemental File	1
NCSA Course Intro	7
Introduction to Data Storage	13
DAS vs. NAS vs. SAN	7
Exciting New Storage Technologies	7
Server Virtualization	14
Data Networks Fundamentals	18
Cloud Fundamentals	13
Scared of the Cloud?	8

NetApp Certified Storage Associate (NCSA) NS0-145: Storage Devices, Storage Systems, and Storage Solutions

Introducing Flash Storage	5
Flash Storage Components and Performance	7
Solid State Technologies	6
Flash Endurance	11
Major Industry Trends Per NetApp	8
OnCommand Management Software	9
Clustered Data ONTAP	8
Data ONTAP 7-Mode	6
NetApp Hardware Basics	11

WEEK 2

153 min.

FAS2500	6
FAS - Up Close and Personal	7

Other NetApp Portfolio Products	12
NetApp Certified Storage Associate (NCSA) NS0-145: Systems Administration and Management	
Connecting with System Manager	6
Using the CLI	13
Creating Aggregates	10
Flash Pools	12
Creating FlexVols	9
Creating Qtrees	5
Calculating Usable Disk Space	11
Creating and Managing SnapShot Copies	9
Network Administration	18
Creating LUNs	9
Using SnapDrive	6
NFS Exports and CIFS Shares	6
Using BranchCache	6
Using Quotas	8

WEEK 3

	99 min.
RBAC	7
Storage System Maintenance	11
Storage Space Management	11

NetApp Certified Storage Associate (NCSA) NS0-145: Clustering and More

Clustered Data ONTAP Concepts	8
Clustered Data ONTAP User Interfaces	6
Clustered Volumes and Namespaces	7

Clustered File Access	7
Clustered Load Balancing	6
SAN Infrastructure	5
FC Connectivity	9
The NCSA Exam	9
Sailing Past the NCSA Exam	10
The Great NCSA Exam Bonus	2
