

Learn NodeJS Fundamentals

This NodeJS Fundamentals course covers how to manage web servers and build robust web applications that scale according to demand. Start learning NodeJS and master essential skills like understanding JavaScript concepts, designing REST APIs, creating endpoints, and parsing query parameters and payloads.

WEEK 1

Get Started with JavaScript

171 min.

Introduction	1
What is JavaScript used for?	16
Run JavaScript in The Browser Console	7
Run JavaScript with HTML	14
Run JavaScript with Node.js	13

Learn JavaScript Syntax

Overview	1
Introduction	1
Declaring Variables in JavaScript	13
If, Else, and Else If in JavaScript	8
JavaScript's Many Different For-Loops	17
While-Loops in JavaScript	7

Basic JavaScript Data Types

Overview	1
Introduction	1
Weak vs. Strong Typing and Dynamic vs. Static Typing	11
Numbers in JavaScript	12
Strings in JavaScript	9
Booleans in JavaScript	13

JavaScript Functions, Objects, and Other Types

Overview	1
Introduction	1
Objects in JavaScript	21

WEEK 2

152 min.

Arrays in JavaScript	9
Functions in JavaScript	14
BigInts, Symbols, and Undefined in JavaScript	12

Scoping, Equality, and Error Handling in JavaScript

Overview	1
Introduction	1
"Let" Variables vs. "Var" Variables	14
Double- and Triple-Equals Comparisons in JavaScript	16
Built-in Errors in JavaScript	13
Try-Catch Blocks in JavaScript	7

Working with JavaScript Arrays

Overview	1
Introduction	1
JavaScript Array Basics	8
Using the Spread Operator with Arrays	13
Array Equality and Passing by Reference	14
Deep-Equals Testing with Arrays	14

Working with JavaScript Objects

Overview	1
Introduction	1
JavaScript Object Basics	9

WEEK 3

151 min.

The Spread Operator and Object Destructuring	18
Object Equality and Passing by Reference	14
Deep-Equals Testing with Objects	15

Working with JavaScript Strings

Overview	1
Introduction	1
In-Depth String Details	17
Array-Related String Methods	22
Colorizing Strings with Chalk	7

Working with JavaScript Functions

Overview	1
Introduction	1
Basic Function Syntax	16
The "arguments" Object	12
Default Arguments in Functions	10
Functions Inside Objects	11

Work with Files in Node.js

Overview	1
Introduction	1

WEEK 4

171 min.

Basics of the FS Package	21
Reading Files	14
Writing Data to Files	11

Working with Command-Line Arguments in Node.js

Overview	1
Introduction	1
Command-Line Arguments in Node.js	18
Parsing Flags in Command-Line Arguments	14
Boolean Flags and Flags with Multiple Values	14

Interactive Command-Line Applications in Node.js

Overview	1
Introduction	1
Getting User Input with Prompts	13
The Readline Promises Package	10
Strategies for Displaying Multiple Prompts	12
Collecting Multi-Line Input	14

Console Drawing with Node.js

Overview	1
Introduction	1
Basic Functions for Console Drawing	21

WEEK 5

163 min.

Drawing a Square	10
Creating a "Draw Rectangle" Function	17

Console Colors with Node.js

Overview	1
Introduction	1
Basic 4-Bit Console Color Syntax	17
8-Bit and RGB Console Color Syntax	12

Other Font Decorations	6
Creating Color Helper Functions	15

Console Animations with Node.js

Overview	1
Introduction	1
Creating a Basic Loading Animation	21
Creating an Animated Loading Bar	15
Position Adjustments for Animations	7
Displaying Progress for Real Tasks	7

Node.js Websocket Basics

Overview	1
Introduction	1
Basics of Websockets	13
Setting Up A Socket.io Client and Server	14

WEEK 6

153 min.

Sending and Handling Socket Events	10
Creating a Simple Chat-Room Program	15

Node Web-Servers: The Basics

Overview	1
Introduction	1
Creating Simple Node Web-Servers	13
The Request and Response Objects	18
Handling Different Paths	12
Restarting the Server Automatically	6

Node Web-Servers: Simple REST API Example

Overview	1
Introduction	1
Designing a REST API	10
Creating a "List" Endpoint	12
Creating a "Read" Endpoint	8
Creating a "Search" Endpoint	11
Creating a "Create" Endpoint	5
Creating "Delete" and "Update" Endpoints	12

Node Web-Servers: Handle Different Request Types

Overview	1
Introduction	1
Handling Different Request Types	12

WEEK 7

98 min.

Testing POST, PUT, and DELETE Routes	8
Handling a Request Body	14
Handling URL and Query Parameters	17

Node Web-Servers: Create Your Own Server Framework

Overview	1
Introduction	1
Basic Framework Design	9
Setting Up a Server Framework	6
Parsing Route Definitions	14
Parsing Query Parameters and Request Payloads	11
Parsing URL Parameters Automatically	15
