

Microsoft 365 Certified: Security Administrator Associate (MS-500)

This Security Administrator Associate (MS-500) training covers how to manage and implement user, threat, and information protections in Microsoft 365. This training helped you prepare to be certified as a security administrator associate for Microsoft 365, a certification that can prepare you for future roles in security or systems administration. It has since been retired.

Configuring Sensitivity Label Policies	16
Sensitivity Labels Teams, SharePoint ,OneDrive and Office Apps.	10
Using The Activity Explorer	4

Manage Data Loss Prevention

Overview	1
Working With DLP	3
Creating DLP Policies In Microsoft 365	19
DLP Full Functionality Test	11

WEEK 4

151 min.

Implementing Endpoint DLP 23

Implement and Manage Microsoft Cloud App Security

Overview 1

Microsoft Defender For Cloud Apps 15

Configuring Mass Download Monitoring Policy 6

Review And Interpret Cloud App Alerts 7

Connecting Cloud Apps to Microsoft Defender. 8

Log and Snapshot Reports 9

Manage Data Governance And Retention

Overview 1

Configuring Data Retention Labels 5

Data Classification 6

Creating Retention Policies 9

Setting Up A Litigation Hold 7

Records Management 12

Microsoft 365 Retention Policies 7

Managing Regulatory Compliance

Overview 1

Planning Compliance Solutions 7

Creating Compliance Assessments 10

Communication Compliance Policies 6

Creating Data Loss Prevention Policies 8

WEEK 5

130 min.

Creating DSR Cases for GDPR Compliance 8

Service Assurance 7

Manage Insider Risk Solutions In Microsoft 365

Overview 1

Introduction to Insider Risk Solutions In Microsoft 365 4

Managing Customer Lockbox 7

Implementing Customer Lockbox 4

Managing Communication Compliance 11

Verifying Communication Compliance 5

Implementing Insider Risk Management Policies 9

Creating An Insider Risk Policy 8

Implementing Information Barrier Policies 14

Discover And Respond To Microsoft 365 Compliance Queries

Overview 1

Working With eDiscovery 10

Using eDiscovery Content Search 7

Deleting Malicious Emails 6

Creating Audit Retention Policies 8

Usage Reports 5

Insider Risk Management 12
