

Juniper Protocol Independent Routing Tunnels

In this course, you'll learn how to prepare, configure and optimize a special routing tool that's particular to Junos: protocol independent routing tunnels. This training is a deep dive into static, aggregate, and generated routes, load balancing, and filter-based forwarding. After you watch this Juniper training, you'll have some of the skills that will prepare you for advancement to higher-level positions engineer positions.

WEEK 1

Advanced Routing Concepts on Junos

66 min.

Introducing Advanced Routing Options	1
Enable Per-Flow Load Balancing	13
Load Balancing Static Routes	4
Backup Static Routes and Default Settings	7
Martian Routes	5
Aggregate Routes	10
Generate Routes	5
Configure Routing Instances	11
Configure Route Leaking	8
Summarizing Advanced Routing	1
