

# Microsoft Certified: Azure Security Engineer Associate (AZ-500)

This intermediate Microsoft Azure Security Engineer Associate training prepares you for the AZ-500 exam, which is required to earn the Microsoft Certified: Azure Security Engineer Associate certification. Become an Azure security engineer associate by learning the skills needed to secure Azure-based networks by implementing security controls.

[CBT Nuggets course material](#) →

## WEEK 1

### Securing Azure AD Identities

157 min.

Azure AD Accounts	8
Creating Azure AD Users Using PowerShell	5
Bulk Create and Delete Azure AD User Accounts	5
Creating Azure AD Groups	12
Azure AD Identity Protection	8
Implementing Azure AD Identity Protection Policies	7

### Securing External Identities and Verifiable Identities

Overview	1
External Identity Settings	4
Creating an External Identity from the Azure Portal	7
Creating External Identities Using PowerShell	6
Verified IDs	13
Configuring Azure Key Vault for Verifiable IDs	3
Configuring Verified ID	6
Finishing Up With Verified IDs	7

### Managing Azure AD Authentication

Overview	1
Configuring MFA in Azure AD	10
Managing MFA In Azure AD	6
Implement Passwordless Authentication In Azure AD	10
Implementing Password Protection	4
Single Sign-On Using Hybrid Identities	2
Enforcing Modern Authentication Protocols	13

## Managing Azure AD Authorization

Overview	1
Roles In Azure	8
Creating Custom Roles in Azure	7

## WEEK 2

154 min.

Privileged Identity Management (PIM)	11
Configure Azure AD PIM	18
Conditional Access Policies	5
Creating Conditional Access Policies	13

## Managing Application Access in Azure AD

Overview	1
Managing Access To Enterprise Apps	7
Permission Consent	7
App Registration	11
App Permission	8
Managed Identities	8
App Proxies	9
App Proxy Setup	8

## Managing Permissions with Microsoft Entra

Overview	1
Microsoft Entra	10
Exploring the Entra Portal	5
Microsoft Entra Permissions Management Settings	4
Onboarding Microsoft Entra's Permissions Management	7
Microsoft Entra's Dashboard & Analytics	8

Entra Remediation and Autopilot	11
---------------------------------	----

## WEEK 3

159 min.

Entra Audit, Reports, and Help	6
Entra Settings, Notifications, and User Management	4

## Managing Azure Network and Application Security Groups

Overview	1
Network Security Groups (NSGs)	4
NSG Rules	10
Creating NSGs	9
NSGs and Service Tags	6
Troubleshooting NSGs	7
Application Security Groups (ASGs)	5
Implementing ASGs	7

## Implementing ExpressRoute Encryption, PaaS Firewall Settings and Using Network Watcher

Overview	1
Configuring IPsec Encryption over Azure ExpressRoute Pt.1	11
Configure IPsec Encryption over Azure ExpressRoute Pt.2	8
Configure Firewall Settings for PaaS Resources	10
Using Network Watcher for Monitoring	9
Using Network Monitor for Network Troubleshooting	9
Network Watcher NSG Flow Logging	6

## Implementing Virtual WAN and Secure VPN Connectivity

Overview	1
Virtual WAN and Secured Virtual Hubs	5
Deploying Azure Virtual WAN and Secured Virtual Hubs	8
Connecting VNETs to Secured Virtual Hubs	7
VPN Connectivity Into vWAN	3
Configure P2S VPN	10
Configuring Teleworker To Test P2S VPN	9

### WEEK 4

151 min.

Configuring S2S VPN	9
---------------------	---

## Exploring VNet Peering, VPN Gateways and UDRs

Overview	1
VNET Peering	5
Configure VNET Peering	6
VPN Gateway w/User Defined Routes (UDRs)	7
Configuring VPN Gateways	5
Virtual Network Gateway Peering	6
Creating Route Tables	4
Creating User Defined Routes (UDRs)	6
Testing Our Routing	7

## Plan and implement network security configurations for an Azure SQL Managed Instance

Overview	1
Azure SQL Managed Instances	6
Azure SQL Managed Instance Security Features	8

Create an Azure SQL Managed Instance	7
Implement SQL Auditing	5
Implement Always Encrypt	7
Implement Defender for SQL	5
Implement Dynamic Data Masking	6
Implement Transparent Data Encryption (TDE)	3

## Implementing virtual network Service Endpoints, Private Endpoints, and Private Link Services

Overview	1
Virtual Network Service Endpoint	9
Implementing a Virtual Network Service Endpoint	9
Service Endpoint Policies	6
Private Endpoints	7
Implementing Private Endpoints	7
Private Link Service	5

### WEEK 5

153 min.

Implementing Private Link Services	13
------------------------------------	----

## Implementing Azure App Service, Azure Functions, and App Service Environments (ASE) Network Integration

Overview	1
Network Integration for Azure App Services and Function Apps	9
Implementing Network Integration for Azure App Services	9
Implementing Two-Way Communications for Our Network Integration	9

App Service Environment Security Features	4
Implementing an ASE App	5
App Service Environment Security Features	10

### Custom TLS certificates for Apps and Azure Firewall Services

Overview	1
Planning Custom TLS Certificates for Apps and APIs	5
Implementing Custom TLS Certs for Apps and APIs	6
Azure Firewall Services	15
Deploying an Azure Firewall	5
Configuring a Route Table and VNET Peering	8
Creating Firewall Rules	14
Additional Azure Firewall Features	4
Azure Firewall Manager	7

### Plan and implement security for public access to Azure resources

Overview	1
Planning for an Azure Application Gateway	5
Implementing an Azure Application Gateway	12
Azure Front Door and CDNs	7

## WEEK 6

**153 min.**

Implementing Azure Front Door	5
Azure Web Application Firewall	11
Azure DDoS Protection	8

### Configure Azure SQL Encryption and Data Protection

Overview	1
Introducing SQL Encryption Operations	1
Azure Virtual Machine Disk Encryption	15
Cell Level Encryption	13
Dynamic Data Masking	9
Transparent Data Encryption	8
AlwaysEncrypted Concepts	11

### Configure Azure SQL Authentication

Overview	1
Introducing SQL Authentication	1
Explore the SQL Architecture	14
Create SQL Logins	14
Create SQL Users	15
Create Azure Active Directory Users	11

### Plan, implement, and manage governance for Azure security

Overview	1
Working With Azure Policy	11

## WEEK 7

**151 min.**

Azure Blueprints	12
Azure Landing Zone	8
Implementing Azure Key Vault RBAC	9
Azure Dedicated HSMS	4
Key Rotation Policies	5
Key Vault Backups	3

## Manage security posture by using Microsoft Defender for Cloud

Overview	1
Secure Score and Inventory	13
Security Frameworks in Defender for Cloud	7
Adding Standards and Custom Initiatives within Defender For Cloud	6
Attack Surface Management	6
Defender for External Attack Surface Management (EASM)	14

## Managing Defender for Servers/Azure SQL and using Azure Monitor

Overview	1
Configure Defender for Servers	5
Evaluate Vulnerability Scans from Defender for Servers	8
Planning for Defender for Azure SQL Databases	4
Implementing Defender for Azure SQL Database	5
Intro to Azure Monitor	11
Saving Resource Logs	10
Azure Monitor Alerting	11
Additional Azure Monitor Features	5

### WEEK 8

## Secure Data in Azure Storage Accounts

156 min.

Overview	1
Introducing Secure Azure Storage Accounts	1
RBAC	12
Shared Access Signatures	12
Shared Access Keys	6

BYOK	11
Data Protection Settings	12
Storage Account Backups	7

## Secure Microsoft Azure Container Registry

Overview	1
Intro to Microsoft Azure Container Registry	9
Compare Features Across Azure Container Registry SKUs	11
Secure Azure Container Registry With Customer-Managed Key	8
Import Images Into Azure Container Registry With PowerShell	8
Secure Azure Container Registry With Private Link	6
Test ACR Private Link Connectivity From Azure Linux VM	9
Apply Azure Policy Compliance Rules to Container Registry	10

## Understand and Secure Azure Container Apps

Overview	1
Intro to Microsoft Azure Container Apps	11
Deploy Simple Azure Container App With NGINX	9
Create Azure Container App Revisions and Scale	9

### WEEK 9

155 min.

Enable Traffic Splitting for Azure Container App Revisions	6
Build Custom Container Image for Azure Container Apps	9
Deploy Custom Container Image to Azure Container Apps	7

Securely Connect Azure Container Apps to Virtual Network 10

### Overview of Securing Azure Kubernetes Service

Overview 1

Intro to Securing Azure Kubernetes Service 10

Learn About TLS Encryption Security for Azure AKS 7

Azure Container Image Registry vs. Public Registries 8

AKS Logging and Metrics & Policy Controls 8

What is Kubernetes Network Policy in AKS? 8

Deploy the AKS Secure Baseline Network Layer 12

Deploy Azure Container Registry and AKS Cluster 10

### Securely Exposing Remote Access to Azure Networks

Overview 1

Intro to Microsoft Azure Secure Remote Access 9

Create Microsoft Azure Bastion Basic SKU Environment 10

Connect to Windows and Linux VMs With Azure Bastion 8

Use Native RDP Client With Azure Bastion Standard 13

Tunnel Linux SSH Connections with Azure Bastion CLI 5

Temporary VM Access With Microsoft Defender Just-in-Time 11

## WEEK 10

### Applied Security for Microsoft Azure API Management

158 min.

Overview 1

Intro to Microsoft Azure API Management 10

Deploy Azure API Management Instance 10

Create API Definition With Mock Response 8

Test API Management Mock Endpoints 5

Secure Access to API Management Products with Subscription Keys 10

Delegate Access to APIs With Workspaces and RBAC 8

### Authentication for Microsoft Azure Kubernetes Service

Overview 1

Intro to Microsoft Azure Kubernetes Service Auth 8

Create AKS Cluster With Azure AD Integration 7

Connect Kubectl to AKS Cluster as Administrative User 9

Create Limited Access Azure AD Dev User and VM 9

Deploy Kubernetes Role and RoleBinding Resources 11

Test Kubernetes Access as Limited Dev User 8

### Implement Networking for Azure Kubernetes Service

Overview 1

Intro to Networking for Azure Kubernetes 10

Understanding the Azure Container Network Interface (CNI) 7

Deploy AKS Clusters With Kubenet and Azure CNI 11

Explore Kubernetes Pods Running on Azure CNI 10

Expose Pods Running on Kubenet via NodePort Service 11

## WEEK 11

158 min.

## Configure Disk Encryption in Microsoft Azure

Overview	1
Intro to Storage Disks in Microsoft Azure	10
Default Disk Encryption for Azure Virtual Machines	10
Enable Customer Managed Key With Disk Encryption Set	11
Understanding Encryption at Host for Azure VMs	7
Evaluate Azure Disk Encryption (ADE) for Block Storage	5
Implement Azure Disk Encryption on Linux VM	13

## Hands-on With Azure API Management Policies

Overview	1
Intro to Microsoft Azure API Management Policies	10
Using the Set Backend Policy for API Management	12
Rewrite URLs With Azure API Management Policy	10
Apply Rate Limit Policy on Azure API Management	9
Define Ruesable Policy Fragments in Azure API Management	8

## Microsoft Sentinel Data Connectors

Overview	1
Data Sources and Prerequisites	15
Configuring Data Connectors Via Policies	5
Syslog and CEF Event Collectors	18
Threat Intelligence Connectors	9

<b>WEEK 12</b>	<b>151 min.</b>
Ingesting Custom Logs	12

## Microsoft Sentinel Analytics Rules

Overview	1
Intro to Sentinel Analytics Rules	1
Design and Configure Analytics Rules	9
Activate Microsoft Security Analytics Rules	4
Custom Analytics Rules	5
Connector Provided Queries and Workflow	4
Incident Creation Logic with KQL	14
KQL Exercise	7
Manage and Use Watchlists	18

## SOAR and Incident Response

Overview	1
Creating Playbooks	8
Automation Rules	6
Defender Playbooks	5
Incidents Within Sentinel	15
Multi-Workspace Incidents	6
User and Entity Behavior Analytics (UEBA)	6

## Sentinel Workbooks, Notebooks and Hunting

Overview	1
Sentinel Workbooks	10
Custom Workbooks	10
Security Operations Efficiency Workbook	5

<b>WEEK 13</b>	<b>46 min.</b>
Threat Hunting Queries	6
Hunting With Livestreams	4

Sentinel Bookmarks	5
Hunting With Notebooks	13
Configure and Use MSTICPy in Notebooks	17
