

Implementing Microsoft 365 Security and Threat Management

This intermediate Microsoft 365 Security and Threat Management training teaches systems administrators to configure and manage tools for identity verification and threat detection within Microsoft 365. Learn to optimize user access, permissions, security reporting, and alerts to ensure comprehensive network protection. This Microsoft 365 skills training is perfect as a Microsoft reference resource on managing Microsoft 365 security.

WEEK 1

Plan for Microsoft Cloud Application Security

164 min.

Configuring Cloud App Security	8
Configuring Cloud App Security Policies	8
Configuring Activity Policies	6
Configuring File Policies	6
Designing Cloud App Security Solutions	4
Managing Cloud App Security Alerts	6
Uploading Cloud App Security Logs	6

Plan and Implement Threat Protection With Microsoft Defender

Overview	1
Microsoft Defender for Endpoint	8
Implementing Microsoft Defender for Identity	4
Integrating Microsoft Defender With Endpoint Manager	5
Attack Surface Reduction	7
Configuring Endpoint Security	9
Disk Encryption and Firewall Policies	5
Creating Security Baselines	6

Manage Security Reports and Alerts

Overview	1
Working With Secure Score	11
Managing Cloud App Security Alerts	6
Managing Office 365 Security Alerts	7
Incident Management and Investigation	8
Configuring ATP Policies	9
Configuring External Mail Tip	4

Secure Identities and Microsoft 365 Hybrid Environments

Overview	1
About the MS-500	10
Plan Azure AD Authentication Options	15

WEEK 2

151 min.

Plan Azure AD Synchronization Options	8
Monitor and Troubleshoot Azure AD Connect Events	11
Implement Azure AD Group Membership	13
Implement Password Management	11
Configure and Manage Identity Governance	8

Implement Authentication Methods

Overview	1
Plan Sign-On Security	8
Implement Multi-Factor Authentication (MFA)	8
Manage and Monitor MFA	12
Plan and Implement Device Authentication Methods Like Windows Hello	15
Configure & Manage User Authentication Options & Self-Service Passwords	6

Implement Role-Based Access Control (RBAC) and Azure AD Identity Protection

Overview	1
Plan for Roles	14
Configure Roles	16
Audit Roles	9
Implement User Risk Policy	8

WEEK 3

157 min.

Implement Sign-In Risk Policy	7
Configure Identity Protection Alerts	4
Review and Respond to Risk Events	5

Implement Conditional Access and Azure AD Privileged Identity Management (PIM)

Overview	1
Plan for Compliance and Conditional Access Policies	13
Configure and Manage Device Compliance for Endpoint Security	9
Implement and Manage Conditional Access	19
Plan for Azure PIM	17
Assign PIM Eligibility and Activate Admin Roles	14
Manage Azure PIM Role Requests and Assignments	15
Monitor PIM History and Alerts	7

Implement and Manage Device Protection

Overview	1
Configure and Manage Microsoft Defender Application Control	13
Configure and Manage Exploit Protection	9
Configure Secure Boot	6
Configure and Manage Windows Device Encryption	8
Configure and Manage Non-Windows Device Encryption	7

WEEK 4

163 min.

Plan and Implement Application Protection for Data on Devices	7
---------------------------------------------------------------	---

Implement and Manage Microsoft Defender for Identity and Endpoints

Overview	1
Plan a Microsoft Defender for Identity Solution	10
Install and Configure Microsoft Defender for Identity	10
Monitor and Manage Microsoft Defender for Identity	10
Plan a Microsoft Defender for Endpoint Solution	9
Implement Microsoft Defender for Endpoint	8
Manage and Monitor Microsoft Defender for Endpoint	8

Implement and Manage Microsoft Defender for Application and Office 365 Protection

Overview	1
Configure Microsoft Defender for Office 365	17
Monitor Microsoft Defender for Office 365	17
Conduct Simulated Attacks Using Attack Simulator	11
Plan for Device and Application Protection	12
Configure and Manage Microsoft Defender Application Guard	7

Monitor Microsoft 365 Security with Azure Sentinel

Overview	1
Plan and Implement Azure Sentinel	18
Manage and Monitor Azure Sentinel	13

WEEK 5

22 min.

Respond to Threats in Azure Sentinel	13
Configure Playbooks in Azure Sentinel	8
